President Coolidge is awaiting word from the Department of Justice as to what action to take on the case of Commissioner Fenning.

Pending recommendations by the department, the President has decided on no action, it was explained yesterday by the White House spokesman.

Some time ago, it was explained on the President's behalf, Mr. Coolidge gave instructions to the Department of Justice to keep watch on the case and advise him what action should be taken, and to also advise him on both angles; that is whether any action should be taken to protect the interests of the Dis trict of Columbia, or to protec Fenning from being unjustly ac-

cused. Officials of the Department of Justice, the White House spokesman further explained, have examined the record in the Fenning case, and have been awaiting the final conclusions of the House judiciary committee before making their recommendations to the Pres ident.

trict subcommittee, which said that the continuance of Mr. Fenning in office was "incompatible with the best interests of the District," until the judiciary committee had had time to make its report.

The subcommittee's report was adopted by the full committee, but without further action it does not go to the House. This subcommittee was acting on the authority of the full committee and not under direction of the House.

Representative Gibson, chairman of subcommittee, made plain that his committee carefully avoided asking definitely for the removal of

Prof. Matthew W. Stirling, of Berkeley, Calif., and Dr. Leroux. the Dutch cartographer, will penetrate the wildest section of the district, whose dangers are traditional.

The native Papuans have displayed the keenest interest in the working of the expedition's airplane, and have erected a huge wooden idol in front of the bungalow of Pilot Hoyt to keep away evil spirits. In some instances the Papuans have displayed nostility toward the plane, on several occasions forcing the aviators to retreat.

Noted Barling Bomber Will Never Fly Again

Dayton, Ohio, June 11 (By A. P.) .- The Barling bomber triplane, of the army air service now housed at Wright field, has flown its last flight.

This became known today when McCook field officers formally announced that although it will remain on exhibition at the field for some time it probably never again would be taken aloft. The data gained from its

flights have more than justifled the expense involved in its construction, they point out, and should occasion ever arise when a plane of its size and type should be needed for a trip, it can be made safe for such flying. It is probable, however, that after a time it will be dismantled.

The plane is propelled by six 400-horsepower Liberty motors and is capable of carrying 10,-000 pounds useful load.

Letters Indicated Young Man Was Kept in the Southern Republic by Threats.

Nogales, Arizona, June 11 (By A. ARLINGTON COUNTY ATTORNEY FEES CUT **\$6,000 BY NEW LAW**

Statute Effective June 22 Reducing Share of Liquor Violators' Fines.

DIVIDEND IS VOTED BY ROSSLYN BANK

E. C. Gibbs Elected President of Fairfax Chamber of Commerce.

ARLINGTON COUNTY
BUREAU OF THE POST,
Tel. Clar. 509. Clarendon, Va.

In accordance with the bill assed by the Virginia legislature effective June 22, affecting prohibition cases in Arlington county.
Commonwealth's Attorney William
C. Gloth last night stated that it
means a reduction of at least \$6,000
in fees to him during the period of a year. Not only is the common-wealth attorney affected, but the fee to police officers; in cases on charge of being under the influence of liquor, has been reduced from \$10 to \$1.50.

The bill provides, according to State Senator Frank L. Ball, the following reductions: Where arrests are made on charges of being under the influence of liquor, the arresting officer will receive a fee of \$1.50, instead of \$10, upon conviction. In cases of transporting less than one-half gallon, the fee has been reduced from \$10 to \$5; in cases of more than one-half gal

on, the fee will remain \$10.

When the defendant pleads uilty in the police court to charge f being under the influence of liquor, the commonwealth's attorney receives no fee, having under the present law received \$10. If defendant goes to trial and is convicted, the fee will be \$5 instead of \$10. In the circuit court, upon plea of guilty the fee to common wealth's attorney will be \$10 instead of \$25, but, should defendant go to trial, upon conviction the trial, upon conviction the fee of \$25 remains.

By the new law, in case of conviction on charge of being under the influence of liquor the fine will be \$9.25 where defendant pleads guilty instead of \$28.25. Where the case goes to trial the fine, including costs, will be \$14.75 instead of \$28.25.

the first dividend of 3 per cent.

Having only been organized one year with a paid-in capital of \$82,700, the treasurer's report shows a surplus of \$8,270 with undivided profits of \$8,500; with the dividend paid there will be an added profit of \$6,000 to be added to the surplus, giving a total of \$14,270. After one year's business this shows the rapid progress of business and the development of Arlington county. The officers are R. Colton Lewis, president; E. T. Fulton, vice presi-

Parents Said to Fear Their Children's Views

New York, June 11 (By A. P.) -Parents afraid of their children and avoiding contact with them for fear of learning the children's true feeling about them, were cited by psychiatrists as a great cause in the youthful behavior disorders and delinquencies of the day, at the closing session of the American Psychiatric association today.

"As far as I can see, adults are terrifically afraid of children," said Dr. Lawson G. Lowery, head of the child guidance clinic Cleveland.

"They have many different attltudes about them, but are afraid to make direct contacts with them." He gave the example of a father, who "did not think children would talk to you," and when analyzed revealed the fear of learning his son's unflattering opinion of him."

"Child clinics are taking the place of the absent parents," said Dr. L. Vernon Briggs, of Boston, who 'said it was psychiatry's duty to bring the parents back into the home.

MONEY IN PRIMARIES.

Now that the Senate committee inquiring into primary campaign expenditures has discovered that enormous sums were spent in Pennsylvania by the Republican managers, what is the committee going to do about it?

If there is any law limiting the expenditure of money in a primary campaign it is a State law. Congress can make no law on the subject. If there is any violation of law, the State must deal with it. Congress can not

The expenditure of extraordinarily large sums by a candidate in an election campaign was criticized by the Senate in the Newberry case; but Newberry was not denied his seat. The present inquiry deals only with primary campaigns. A primary is a device for nominating party candidates. Many are nominated, but only one is elected. The Senate inquiry deals with defeated primary candidates as well as with those who were nominated.

If the Senate can set itself up as the judge of the nomination of its members, as well asof their election, it can set aside the Constitution and usurp the authority of the States in fixing the time, places and manner of holding senatorial primaries.

The Senate inquiry may bring public opprobrium upon candidates in whose behalf primary expenditures were made of such size as to imply corruption; but unless a candidate is subsequently elected the Senate must leave to the State the question of keeping the ballot pure. And if the successful candidate has been elected without corruption, the Senate ought to seat him, whether he spent or had spent for him in his primary campaign \$1 or \$1,000,000

Until the primary system is abolished there will be scandals in the expenditure of campaign funds in such States as Pennsylvania, where a primary nomination is equivalent to election. The point which should be borne in mind, however, is that it is the State and not Congress which has jurisdiction over pri-

The primary system encourages the expenditure of vast sums of money. It is an evil system. But it is beyond the power of Congress to apply the remedy. The States owe it to themselves to abolish the system .-

PRODUCTION OF GOLD.

As a possible means of stabilizing prices and preventing wide fluctuations in prices, Dr. R. A. Lehfeldt, of South Africa, told the House might be well to hold an international conference to devise plans for controlling the production of gold. He suggested the creation of an international commission with power to take over and control and operate all the lead- swimming without permission. ing gold mines of the world, to prevent overproduction.

Dr. Lehfeldt told how prices tended steadily downward from 1873 to 1896, followed by a steady rise in prices up to the world war. In the first period, he said, the amount of gold produced at the mines was not sufficient; but in the second period the cost of production was too great. He maintained that if a superabundance of gold should continue it will not be possible to maintain the price level. Discount rate must be supplemented by control of gold, in his opinion.

The production of gold in the United States and in the world has declined somewhat since 1918. This was due, so far as the United States is concerned, to the increased cost of production. However, covering a long period of time, it is significant that the world production of gold has about kept pace with population and wealth.

The most common need of the average town seems to be another good southpaw.

THE ADVANCE IN SURGERY.

An extraordinary surgical operation was performed in the Samaritan hospital of Philadelphia a short time ago by the surgeon-inchief of that institution, Dr. W. Wayne Bab cock, which demonstrates the great strides that surgery has made. Dr. Babcock recently showed 100 prominent surgeons from all parts of the country, members of the American Therapeutic society, how he conducted the operation, which was for aneurism. Aneurism is an infection of the artery walls that causes the arteries to swell and increases the blood pressure in spots, producing internal hemorrhages that nearly always cause death. The oung man upon whom the operation was nerformed had been in a critical condition, suffering great pain, until the operation relieved

He is now in perfect health. The infection of the aorta, which is the main artery leading from the heart across the chest, was held by Dr. Babcock to be the cause of the young man's illness.

chest and made an incision into the carotid artery which leads from the aorta and furnishes blood to the brain. By tying off one end and attaching the other to an adjoining vein, he enabled the blood stream to take a new course. The pressure immediately began to decrease in the aorta, which was infected above the right breast. By deflecting the flow of blood from the artery into a vein which was able to stand additional pressure the surgeon was able to decrease the pressure on the infected aorta, and the result was a permanent cure.

This operation, it was agreed by surgeons to whom it was demonstrated, marks an important step forward in the treatment of diseases of the heart.

Usually you can tell by the energy a man applies to a spade whether his mind is occupied with vegetables or bait.

THE TARIFF AND REVENUE.

In the early days when the United States was struggling to its feet the tariff policy was adopted largely for revenue purposes. It provided the Treasury with the bulk of its funds for the operation of the Federal machine. The civil war needs demanded more revenue than import duties could provide, and the internal revenue system was revived from the days of Jackson, who had abolished it.

During the civil war nearly two-thirds of the Federal revenue, outside of loans, came from customs duties, only one-seventh coming from internal revenue and the remainder from miscellaneous sources.

From 1870 to 1900, a period of 30 years, from one-half to two-thirds of the total ordinary revenue came from customs. Throughout this period of 30 years the total revenue from customs averaged about \$250,000,000the lowest point being in 1894, when customs revenues totaled only \$131,000,000.

From 1900 to 1914, when the world war broke out, internal revenue receipts were only about 5 per cent of the total receipts. From 1918 to 1922, internal revenue receipts formed about one-half of the total, reaching more than \$3,000,000,000 a year on the average.

Beginning with the year 1923, receipts from nternal revenue dropped to about \$1,600,000,-000, or less than one-half the total, while customs receipts increased to \$562,000,000, or about one-sixth of the total. This fiscal year, ending June 30, 1926, total customs receipts will reach approximately \$600,000,000—the highest point in the history of the country. This volume of customs receipts will be considerably more than one-sixth of the total ordinary revenue

This increase in customs revenue receipts makes it possible to cut down direct taxes. As a revenue-raiser the tariff law of 1922 is a gigantic success.

They'll never find the original man. It's hard enough to find an original man.

FEDERAL TORT CLAIMS BILL.

The House has agreed to what is known as the Federal Tort Claims bill. It is well known that the present method of considering private claims is archaic. It is only fair and just that any legitimate claim against the government should be paid without unreasonable delay, especially since the government is prompt in demanding payment of claims against individuals. The government should set a good example by paying proper claims promptly.

At present there is so much red tape in government procedure that the long delay practically amounts to a denial of the claim. Any legislation to relieve this situation and to facilitate the prompt payment of fust claims is welcome

Under the present law claimants for amounts up to \$1,000 have the right to have their claims adjusted in the department. The bill agreed to by the House increases this limit to \$5,000. In this session of Congress the committee on claims has had 2,000 bills before it, all for personal claims. The committee has already disposed of about 200, but it is impossible to consider and dispose of the entire 2,000 claims. They are buried.

Times change. We can remember when a boy was very daring and tough if he went

A CLEVER SCHEME.

Sir Josiah Stamp, a British economist, recently diagnosed the proposed Haugen-McNary farm equalization scheme, and pronounced it sound and safe-for Great Britain. Analysis shows that such a plan, if put into operation. would make basic farm products and food products cheaper in Creat Britain than in the United States. The Federal farm board would sell the surplus in the world's markets for whatever it could obtain, while the domestic price to the American consumers would be increased by the import duty plus the cost of transportation.

Sir Josiah is a free trader, and, naturally, would indorse any scheme that would lower the cost of American food in Great Britain and help solve the unemployment problem in that country, thus stimulating British competition with the United States in the markets of the world for manufactured commodities.

Splendid for Great Britain, but what about

Election returns teach us that virtue triimphs if it has a fat campaign fund and a darned good organization.

HELPING THE FARMERS.

Often it is charged that while Congress legislates to help other groups and enacts laws to promote the interests of commerce, industry, railroads, banks, &c., it neglects the The bureau of agricultural economics this

year, ending June 30, 1926, will have received \$4.738,000; and the bureau is operated exclusively for the benefit of the farmers.

A national conference of agriculture was called by President Harding, and another by President Coolidge. Congress created a commission to study the agricultural situation.

Congress passed the agricultural credits act of 1923, providing for the creation of interdiate credit banks solely for the benefit o the farmers. On May 15, 1926, the outstanding loans by this institution were more than \$80, began operating on the neck instead of the | 000,000. Up to March 31, 1926, the Federal

joint stock banks had loaned the farmers a total of \$1.875,756,575. The War Finance Corporation was revived in 1923 for the spe-

cific purpose of assisting the farmers, Congress passed the warehouse act permitting farmers to store cotton, grain, wool, tobacco and any other farm products suitable for storage. The cotton standards act was passed for the growers of cotton. Federal inspection of butter was established for the farmers. Agricultural rehabilitation was created for the farmers. Agricultural cooperation is promoted for the farmers.

Congress has passed an act creating what is known as the cooperative extension work, for which last year about \$7,240,000 was expended. The bureau of home economics was established to promote the interests of the farmers. The packers and stockyards act of 1921 was enacted for the benefit of the cattle growers and farmers. This requires about \$450,000 to administer every year. The grain futures act of 1922 was passed for the benefit of the farmers. Finally the Federal aid highway system, which costs the government large sums of money each year, is largely for the benefit of the rural population.

The tariff of 1922 was framed to suit the demands of the farmers.

In view of the billions of dollars that have been spent by the government for the benefit of the farmers, it is strange that any citizen can say that Congress has neglected the

OFFICIAL BEEF GRADES.

The Department of Agriculture has recently promulgated regulations governing the grading of beef. There are five grades or classes designated as steer beef, heifer beef, cow beef, bull beef and stag beef. Tentative grades were established in 1923, but last year after several public hearings to sound the sentiment of cattle men, packers, and wholesale and retail dealers, that sentiment was found to be very largely in favor of the standardized grades as

The system of standardized grading has been in use by the bureau of agricultural economics for several years, and under it millions of pounds have been purchased by the United States lines, many independent steamship lines and the purchasing departments of many institutions, public and private.

Now comes the news that the dining car department of the Pennsylvania railroad has decided to buy only such beef as is graded "blue ribbon" by the Department of Agriculture. Vice President Sanders, who has direct charge of that division of the railroad's activities, predicts that all the other Class A roads will be compelled to follow the lead of the Pennsylvania. All of this is very gratifying to the producers of high grade beef cattle, and it will certainly have the general effect of creating a better market for graded meats than has heretofore existed.

If the private consumer will follow the lead of the railroads and insist upon "being shown" the government grade marks before ordering a roast or a steak from his butcher the new grade regulations will benefit the home consumer as well as the patron of the dining car

It isn't true that all stories are as old as the race. The race had existed for a long time be fore there were two Irishmen.

ON THE BARGAIN COUNTER.

Thirty-five miles of street railways in the city of New York are for sale at a bargain, and regardless of cost. These trolley lines are not located in the unsettled portions of the annexed territory, but are in the heart of Manhattan. One of them is the Fourth and Madison avenue line, another runs through Eighth avenue and the third in Ninth avenue. Recently a motor bus company made a proposition to establish motor bus lines on such satisfactory terms that the city authorities have about come to the conclusion to accept their offer. Surface lines are passe in the big city, The bill is made retroactive, running back and the owners of those lines realize that to 1920 in order to relieve the committee on their business, instead of growing with the on banking and currency that it claims of some 600 claims that may just as growth of the municipality, is rapidly declining.

They have offered to abandon their franchises to the city for \$7,000,000, in spite of the fact that the cost of construction with equipment foots up to \$50,000,000 and the cost of replacement today would probably be twice that sum.

The day for the successful operation of surface street car lines in big cities has departed. In New York the elevated lines made the first big cuts into the receipts of the surface com panies. Then came the subways, and now come buses. It is impossible to construct subways through all sections now supplied with transportation by trolley, and there will never be another mile of elevated road authorized. Therefore the bus must solve the prob

The Worst Story I Heard Today-By Will Rogers

The Worst Joke I heard today was told to me by Dr. Driscoll, of Los Angeles. Doc has the greatest gag in the world. He has a better thing than the Mayos. You know every woman in the World nowadays is trying to get thin and still keep eating everything. Well. this Doc person I am telling you about beats and rolls and mauls them about some way and even if they have been living on Potatoes and Pastry, why Doc will make them look stylish. He is working on my old friend Charley Russell, the Cowboy Artist, and he has him so he can draw those Cowboy Cartoons with either hand or foot. The Doc is comical with it. He will not only knead a few hunks of avoirdupois out of you but he will hand you Here is one on a Coue cult member, he tells.

This Actor went to call on a sick friend. "You can't see him," replied the maid. "He is very ill." Nonsense, he only thinks he is ill," replied Nonsense, he only thinks he is in, replied the disciple of Coue. Every time the actor stopped at the house and inquired, he would always repeat that there was nothing the matter with his friend. Finally at the end of the week, he come and asked, "well, does he still think he is ill?"

"No, sir," was the maid's reply. "Now thinks he is dead, so we buried him." (Copyright 1926, The McNaught Syndicate Jac)

New York's Bigness. Newark Evening News: Multi-tudes will understand Mr. Van Dyke's explanation of why he is leaving: "I love New York and I hate New York." It is a wonder city. It has its lure. It offers superb opportunities. But at a price. It has power, bigness, magic, beauty. So have Niagara, the Yellowstone and a rolling mill. It seares stone and a rolling mill. Law in England.

Boston Transcript: Although the latest reports from England showed a reduction, not an increase, in the already small number of violent crimes annually committed in that orderly realm, Englishmen seem bent on still further protecting, by severe law, the peace and safety of their land. For example, the minimum penalty for drunken driving has been raised, even on the first offense, to four months' imprisonment or a fine of approximately \$250.

THE CAUSE OF TRAFFIC ACCIDENTS.

By M. O. ELDRIDGE, Director of Traffic, Washington, D. C.

To protect and preserve human life is everybody's business. This requires the cooperation of the entire community; those who travel by automobile and street car as well as those who travel on foot

Everybody seems to be agreed that motor car drivers should be compelled to qualify by some sort of test as to their mental and physical fitness and to submit to definitely established requirements before they are permitted to drive.

It is also a recognized fact that pedestrians have certain rights on the violence, of armed intimidation and streets as well as motorists, and that pedestrians should be governed by mutual distrust and enmity, culmicertain rules of conduct as to their use of the streets in order that traffic nating, at almost calculable in-

The last three traffic deaths which occurred in Washington have been pedestrians who heedlessly and carelessly stepped into the street and people can smash laws faster than actually walkd into the sides of moving automobiles and were struck down by the rear fenders.

There are certain traffic hazards which are directly traceable to defective mental processes. One of these is inattention. Just as soon as the mental processes. One of these is inattention. Just as soon as my feelings this morning with the mental element of concentration or attention to the problem at hand ceived a check from the U. lapses, trouble is imminent.

"LET'S GO"=To Church=YOUR Church

Our Thoughts

"For as he thinketh in his heart, so is he."-Prov. 23:

MAN is literally what he thinks, his character being the sum of all his thoughts. As the plant springs from the seed, so every act of a man springs from the hidden seeds of thought. A man's mind may be likened to a garden, which may be intelligently cultivated or allowed to run wild; but whether cultivated or neglected, it must, and will, bring forth. If no useful seeds are put into it, then an abundance of useless weed seeds will fall therein, and will continue to produce their kind.

By the right choice and the true application of thought man ascends to better things; by the abuse and wrong application of thought he descends to lower levels. Between these two extremes are all the grades of character.

A noble and God-like character is not a thing of favor or chance, but is the natural result of continued effort.

The reward for this effort is Joy, Peace and Contentment of mind, which always comes to a well-rounded character.

The Church today is the one institution which is continually planting good thoughts in the minds of the people, and stands as a bulwark against the degrading influences around us.

THE ELDERLY ENTER-

HERE are many older people who would be glad to give parties for the young mem-rs of their families if they knew Since I can not wisely run bers of their families if they knew how. But sometimes they have allowed themselves to drop out of the usual round of social life. They have ceased to do more than ask their own friends to quiet dinners or small bridge parties. Even general visiting (which at least keeps your lists of acquaintances before your eyes) they have long given up. Yet here is a granddaughter or a grandniece coming out and they would like to do something to give her pleasure. They may not want to upset their old houses. Then let them hire rooms at a club or restaurant or hotel. The private-house entertainment has always a distinctive hospitality which the entertainment at public, or semipublic, rooms lacks, but convention today allows smart dances to be given in such rooms. Service, food and music are more easily arranged for, and all trouble is taken off the shoulders of people who do not feel equal to taking it themselves.

Then comes the question of whom to ask, Grandparents have a way and they have allowed the shoulders of people who do not feel equal to taking it themselves.

Then comes the question of whom to ask, Grandparents have a way and they have all over Great Britain to raise money for warm clothing."

They must accept advice from some one more in the social movement of the moment, about this and many things. They need not outrage their prejudices, but they must soften them to suit young feelings. They must let the young superintend the party; then pay the bills and hope the evening was worth what it cost. After all, their desire was to give pleasure, and that can only be given in the way it pleases, and never for nothing.

BANQUISHING SLEEP-LESSNESS. By Viola Paris.

THE woman who would be beautiful simply must make up her mind that she can not accomplish her ambition at the expense of sleep. A generous amount of undisturbed slumber is an absolute essential, and the lack of it shows only too plainly in the feminine face.

An acquaintance of mine, who knows how strongly I feel on this subject, really said to me, "It does no good to preach about lots of sleep in my case. Even if I do go to bed early, I can't get to sleep for hours and hours. So I might as well stay up and have a good time."

well stay up and have a good time."

I have the greatest sympathy for any one who is troubled with insomnia, but it is obviously unwise to encourage a tendency toward it. And that is exactly what the sleep-less person does who thinks it is useless to go to bed at a reasonable hour.

What can be done to overcome insomnia?

This is, of course, a question for a physician. True insomnia can be a very serious matter; but there are many of us who are occasionally simply restless and wakeful. In such cases, there are various harmless devices to which we can resort to quiet the nerves and induce slumber.

One such device is to combine deep breathing with gentle foot exercises. This is accomplished by pressing the feet together and turning them slowly to the left and to the right, also raising and lowering the breaths mentally. Usually, one doesn't get very far with the counting.

Introducing "Savoir Faire" The Smartest Ensemble Frock of the Season

WE named this costume "Savoir Faire" because perfectly catches the spirit of the modern girl. With its delightfully assured air of knowing what it is aboutthis ensemble frock is bound to win admiration for its wearer wherever she may be.

THE two-piece frock has the sleeveless jumper and pleated skirt, of course, and subscribes cheerfully to the latest Paris craze for black and white scalloped embroideries. The short coat is silk braid bound and beautifully tailored. Silk crepe is the medium for the frock and black velused the state of vet develops the coat.

Brightwood Citizens Association Wants Him Named Utilities Commissioner.

ASK SIDE TROLLEY POLES

William McK Clayton was in dorsed last night by the Brightwood Citizens association for public utilities commissioner, if created by legislation now pending in Congress. A resolution that the association appoint a campaign committee to further the interests of Mr. Clayton was adopted unanimously.

The adoption of the resolution was prefaced with laudatory remarks on Mr. Clayton's long record of uncompensated work in interest of the public, and he was cited as

one of the foremost experts in utilities questions in the city.

A resolution calling for removal of center trolley poles on Georgia avenue and their replacement with avenue and their replacement with poles on the side, such as the ones on Connecticut avenue, was adopted. It was said by several members that the Washington Railway & Electric Co. had already located heavier poles along the thoroughfare in order that they might be installed before the order compelling side poles.

A resolution to forward a letter of condolence to the vice presi-dent, Mrs. H. S. Parsons, on the death of her father, John B. Mc-

death of her father, John B. Mc-Carthy, was passed.

Mr. Clayton lauded efforts of the House and Senate District committees, especially Senator Capper, and was author of a resolution of thanks which the association adopted and will forward to the committees. A resolution condemning condition of Rittenhouse street and calling for its immediate repair, was also adopted by the aspair, was also adopted by the association. The meeting last night was the last of this season, and meetings will not be held again until October.

INDIA'S OPIUM EXPORTS **WILL CEASE IN 10 YEARS**

Sales to Be Cut 10 Per Cent Each Year, Beginning in 1927, London Says.

IMPORTANCE IS STRESSED

London, June 11 (By A. P.) .-Export of opium from India, except for medicinal purposes, will cease in ten years, according to an announcement from the India office just made public. The loss in revenue involved, it was stated, will be \$7,200,000 annually, and to avoid too serious economic effect a gradual curtailment covering the

radual curtainment covering the ten years has been arranged.

The first 10 per cent decrease will be effected in 1927 and the final export will take place in 1935.

"The government of India," says the communication, "with concurrence of the secretary of state, has decided to fix ten years a period. rence of the secretary of state, has decided to fix ten years as a period within which the export of opium from India for other than strictly medical purposes will be progressively and finally extinguished. During this period exports will be by direct sale to the government of importing countries."

New York, June 11 (By A. P.).— The decision of the government of India to end the export of opium is an important step in combatting misuse of the drug, said Mrs. Helen Howell Moorland, secretary of the opium research committee of the Foreign Policy association today. "This news is very important to

Americans interested in opium," she said, "because the withdrawal of the American delegation from the conference at Geneva in 1925 hinged largely on the question of the date when the suppression of smoking opium would begin."

GORMAN TO APPEAL DRUNK CHARGE FINE

tinue after giving a warning, they said, but Capt. Hutter called them a "couple of hick cops" and made

them angry. Representative Gorman said last night that the officers first charged Capt. Hutter with speeding, but he made this charge seem ridiculous by pointing out that the policemen were on foot and therefore could not gauge the speed. Then, he said, Capt. Hutter was charged with driving while drunk. The policemen said they never had any intention of

charging speeeding.

Mrs. Morris, who is the only woman magistrate in Maryland, declared that Capt. Hutter was unmanageable from the time he was arrested and was constantly hurling abuses at the policemen.

Representative Gorman said that when Capt. Hutter was charged with heing drunk he became alarm.

when Capt. Hutter was charged with being drunk, he became alarmed and decided to call in a physician. Such a charge, he thought, would hurt the officer's military record. So Dr. Baker was routed from bed and brought to the trial. Neither Representative Gorman nor Capt. Hutter knew him.

Although Dr. Baker testified that Although Dr. Baker testified that Capt. Hutter was not drunk at that time—2:05 o'clock—Mrs. Morris decided that he was drunk and fined him \$100 for driving while under the influence of liquor. She then fined Representative Gorman \$10 for being drunk.

(CONTINUED FROM FIRST PAGE.) Sunday. One passenger produced a circular given him by Haitians at port-au-Prince. It read in part: "Look out.

"Mr. Borno, so-called president of Haiti, is going to the United States. Mr. Borno is only president de fac to, having been elected in spite o the fact that he is ineligible, being the son of a foreigner. Up to now. so far as it is known, Washington has not recognized the new government, and it is supposed that Mr. Borno is going to explain matters and try to deceive President Coolidge and the American people."

President Borno was interviewed. "The situation in Haiti is excel-lent, both politically and economi-cally, with splendid prospects for the future," he said. "I am fully satisfied with the heartfelt coopera-tion we have received from Ameri-ca, and without which Haiti could not be in her sound and sane state today

"My principal purpose in visiting the United States is to examine with the United States is to examine with your government some of the problems which concern the two countries, in order that personal relationships and the opportunity for a frank exchange of views shall strengthen the cordial relations that now exist."

At city hall, Mayor James J. Walker welcomed President Borno and Mrs. Borno. The visitor, who received part of his education in Paris, replied in French.

WASHINGTON TOMORROW'S

Department of Justice

Diagonally across from the Treasury Department on the south side of Pennsylvania Avenue, the United States Government plans to expend a portion of the recently appropriated fifty million dollars in the erection of a new building to house the Department of Justice. Facing one of the world's famous highways, this new imposing structure will establish a permanent value to property in that section of the Capital City.

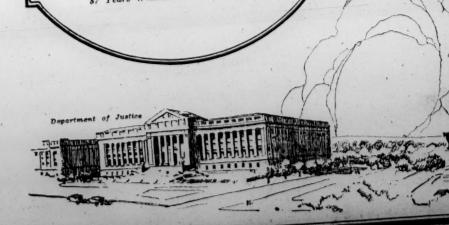

The erection of this department, along with the other proposed buildings, show the Government's faith in Washington. Swartzell, Rheem and Hensey Company placed its faith in Washington over fifty-seven years ago by determining to handle first mortgages on property in the city exclusively. and its record of over half a century without loss to an investor has shown where this faith was justified.

The future of Washington is insured by the Government's new building program. The future of your investments is insured by investment in our first mortgages at 61/2 %.

Nats to Play Giants Drop Fourth; Cardinals Are Victors Local Team In Chicago Today

Third Game of Trip Is Rained Out; Johnson to Pitch.

Harris Much Pleased With Promise of Reeves.

By FRANK H. YOUNG.

LEVELAND, Ohio, June 10.— The Nats so far this trip have visited three cities and rain has interfered with their plans in each, today's scheduled contest being washed off the board by a steady rain which started early this morning and was still going strong when Manager Harris and his gang boarded a rattler for Chicago, the next stop.

It was another tough break for

Washington club treasury, as indications are that a banner crowd would have been on hand, since the contest was one of several Cleve-land-Canada day features. Rain did not break up all of the plans, however, for a troop of Toronto High-landers staged their scheduled drill on Dunn field an hour before game time, but a diamond battle was out of the question. The postponement adds another date to the Nats' list of August double-headers.

of August double-headers.

A four-game series opens with Collins' White Sox in Chicago tomorrow, with Walter Johnson slated to have worked today for the Harrismen, being held over for this Windy City opener. These games will be most important in the young lives of the Nats, as the Sox are in third place, but a game and a half ahead of them.

The writer often has heard fans

The writer often has heard fans remark after the Nats have been

Just so they get their salary, they're satisfied. It's all in a day's work for them." But this is far from being the case. When the Harrismen are winning their games regularly they're like a bunch of school boys. But the slump which they are now in certainly has not improved their dispositions any and they are just about as pleasant traveling companions as a bunch of wild animals.

Like Capitol city fans, after having had two tastes of baseball high life, the crusts of a second division berth are not particularly palatable, and right down in their hearts Nat players realize that only a miracle will give them a 1926 pennant. Of course, these occasionally occur-like the Mackmen's unaccountable like the Mackmen's unaccountable slump of last fall or Coveleskie's triple of yesterday—but they are things which are not sure like death and taxes and can not be included to the door flowers.

New York, June 11 (By A. P.).—
The New York Giants suffered their fourth straight setback today when they were defeated by St. Louis, 10 to 2. Fitzsimmons started on the mound for the Giants and yielded two runs in seven innings, both a result of wild pitches. With Southney Davies nitching in the both a result of wild pitches. With Southpaw Davies pitching in the eighth and ninth the Cardinals enjoyed a batting feast, scoring four times in each inning. The Giants' infield cracked and contributed to the Card rally.

gravel near Rockville, Md., on July 4, in which the plaintiffs demanded a total of \$34,500 damages, resulted in a verdict yesterday for a total of \$1,000 against Miss Bechtold in all of the cases. The automobile struck a culvert after skidding.

Mrs. Julia Bechtold, 138 R. street northeast, mother of the defendant, and Mrs. Alma Rohrkemper, sister of the defendant, and the three Rhorkemper children were the plaintiffs and were in the Bechtold car. There were five different plainplaintiffs and were in the Bechtold car. There were five diferent plaintiffs but there were six suits in all—the sixth suit being accounted for by the filing by Mrs. Rohrkemper of a separate action on behalf of one of the children, for the alleged loss of services. The jury failed to award any damages for the alleged loss of services of the child, but confined its verdict to the suits for actual injuries. for actual injuries.
